## Pismo Beach

### *Martin Resorts Begins Building Pedestrian Bridge To Improve Access To The California Coastal Trail*

Martin Resorts has embarked on a coastal restoration project. Upon completion, it will improve and provide contiguous accessibility to the California Coastal Trail including a pedestrian bridge between Shore Cliff Hotel and Pismo Lighthouse Suites.

This will provide trail users with an uninterrupted walk along the bluffs from Dinosaur Caves Park to the main beach and the iconic Pismo Pier.

Martin Resorts is dedicated to preserving this coastline, and at the same time assuring our guests are impacted as little as possible during this time. Although work is to be completed during daytime hours, we want to be sensitive to our guests as well. Much of the work currently is over the side of the bluffs and less invasive, however, the presence of a large crane will be visible on property and from the pool area. We will do our best to place guests in areas with the least amount of disruption.

This project is the culmination of many years of work with the California Coastal Commission and included rigorous environmental and archaeological reviews.

If you have specific questions regarding your upcoming stay, please do not hesitate to contact us. Thank you in advance for your patience during this time.

 = Proposed Bridge location. Not to scale.
